★ HOLY CRAP
— *You Have Derailed!!*

Please! Stop!!

Our data looks [sic] good. Trust me.

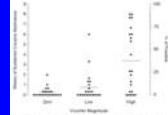

Fig. 2. Longest duration of sustained cardiac arrhythmia achieved during the first 100 minutes for female patients and high target cardiac output (mg/L) over 100 minutes. Each point represents data from an individual patient (n=10) and the error bars represent standard deviation. The horizontal line represents the mean of the 100-minute duration of sustained arrhythmia for 10 patients in each condition.
